

Josué Fernández Díaz

Cartago, Costa Rica

✉ josue.0795@gmail.com • [LinkedIn](#), [GitHub](#)

Full Stack Software Engineer with 7+ years building and scaling SaaS products end-to-end, primarily with Ruby on Rails, React, and AWS. Repeatedly stepped into de facto technical leadership – owning Postmark’s next-generation template editor over a 10-month initiative, leading a billing platform migration, and modernizing SmarterSelect’s legacy Rails 4 platform into a Rails 6 API with React. Known for pairing hands-on delivery with strong documentation practices, cross-functional communication, and mentoring and onboarding new engineers.

Core Competencies

- **Ruby on Rails & React:** 6+ years building and scaling production SaaS applications end-to-end, from Rails 4 through Rails 6 APIs paired with React frontends.
- **Technical Leadership Without the Title:** Served as de facto Tech Lead at Postmark through major team restructuring; led a 10-month template-editor initiative with executive-level communication, and a billing platform migration.
- **Legacy System Modernization:** Migrated SmarterSelect from Rails 4/jQuery to a Rails 6 API + React, cutting load times from over 20 seconds to under 8; modernized EmberJS (v1) components at Pixel506.
- **Testing & Quality:** Designed a Playwright test framework with modular architecture and parallel execution, reaching approximately 95% code coverage.
- **Compliance & Data Privacy:** Integrated OneTrust, Segment, and Google Tag Manager to enforce GDPR-compliant user consent at Blue Apron.
- **Documentation & Onboarding:** Authored 30+ documentation pages and standardized PR templates; designed technical assessments and led hiring/onboarding for engineers and contractors.

Professional Experience

- **ActiveCampaign (Postmark)** **Heredia, Costa Rica**
Apr 2024 - Sep 2026
Senior Software Engineer
 - Served as de facto Tech Lead and primary frontend owner for Postmark, ensuring product stability, delivery continuity, and code quality through major team transitions and restructuring.
 - Spearheaded the technical discovery, cross-functional alignment, and full-lifecycle delivery of Postmark’s next-generation template editor over a 10-month initiative, leading end-to-end decision-making and executive communication.
 - Served as technical lead and subject-matter expert for Postmark’s billing platform migration, driving system design, ticket breakdown, cross-team alignment, and contractor onboarding.
 - Championed end-to-end hiring and onboarding for new engineers and contractors, designing technical assessments and conducting interviews.
 - Authored and maintained 30+ documentation pages covering onboarding, on-call, and domain knowledge; standardized engineering communication via PR templates.
- **ActiveCampaign** **Heredia, Costa Rica**
Aug 2023 - Apr 2024
Software Engineer
 - Owned multiple end-to-end initiatives to improve Customer Support efficiency, leading planning, development, deployment, stakeholder communication, documentation, and demos.
 - Designed and implemented a new Playwright test framework with modular architecture and parallel execution, achieving approximately 95% code coverage and significantly reducing test runtimes.
 - Delivered internal tools that streamlined workflows and centralized key account data, contributing to a reduction in Customer Support ticket reply times from 6 hours to 23 minutes company-wide.

- **Gorilla Logic (Blue Apron)** **San José, Costa Rica**
Oct 2022 - Mar 2023
Fullstack Software Developer
 - Developed and maintained features for Blue Apron's web platform using Ruby on Rails and React, focusing on compliance and data privacy requirements.
 - Integrated OneTrust, Segment, and Google Tag Manager within the Rails backend and React frontend to enforce user consent preferences and ensure GDPR compliance.
 - Collaborated with cross-functional teams to optimize user data flow and analytics accuracy.
- **Pixel506 (CreativeDrive)** **Escazú, Costa Rica**
Jan 2022 - Sep 2022
Full Stack Software Engineer
 - Contributed to feature development and maintenance of a large-scale web platform built with Ruby on Rails and EmberJS.
 - Reengineered a drag-and-drop onboarding component in JavaScript to improve usability within legacy EmberJS (v1) constraints.
- **SmarterSelect** **Remote**
Oct 2019 - Dec 2021
Full Stack Engineer
 - Spearheaded the modernization of SmarterSelect's legacy monolithic platform, upgrading from Rails 4/jQuery to a new Rails 6 API and React-based frontend.
 - Rebuilt the application's data table architecture and optimized backend queries, reducing load times from over 20 seconds to under 8 seconds.
 - Overhauled the translation system to enable full multilingual support, allowing new global customers to onboard within a week regardless of language requirements.
- **4Geeks (Daddy)** **San José, Costa Rica**
Jan 2019 - Sep 2019
Backend Engineer
 - Designed and implemented the backend for a video analysis platform, evaluating computer vision algorithms to build a Python/OpenCV solution for detection, count, occlusion, and motility tracking.
 - Developed a Django REST API to manage user samples, storing video data in AWS S3 and orchestrating AWS Lambda pipelines for automated analysis.

Education

- **Instituto Tecnológico de Costa Rica** **Cartago, Costa Rica**
2015-2019
Bachelor's in Computing Engineering
 Mentor, IntegraTEC; presenter at the TEC Vocational Fair and the "Camina sin Miedo" booth (TEC Emprende Lab).

Languages

- Spanish (native), English (C1 / advanced).
